 @petalwell

Make any space your own with a new and innovative way to enjoy the therapeutic benefits of essential oils wherever and whenever you want.

PETALWELL is a unique, personal and portable essential oils diffuser, designed and manufactured in Ireland. Exquisitely styled, precision-crafted and rechargeable, PETALWELL has reimagined and reinvented the aromatherapy diffuser. Pack it in your luggage, carry it in your briefcase, and own any room you're in.

Working closely with a leading aromatherapist and scent developer, PETALWELL has created its own exclusive range of healing essential oil blends to use with the PETALWELL diffuser. The oils are organic and wild harvested and contain no artificial chemicals or preservatives.

These beautifully fragrant, natural oils have their own unique blueprint with powerful active ingredients to help restore the natural flow of energy: the comforting aroma of frankincense, wild and intoxicating jasmine, energizing pink grapefruit, mellow sandalwood and joyful bergamot.

To create the mood, just add 6-8 drops of the blend to the PETALWELL, click to start its in-built heater and automatic timer and let the fragrant aroma embrace you. The PETALWELL is clean, safe and easy to use.

Irish family company, Oglesby & Butler Ltd, created PETALWELL. With 3 decades experience of world-class engineering and product design in-house, PETALWELL's patented technology represents a new way to capture the benefits of aromatherapy.
